

Plastic Shell Enclosure for the 1046

The 3854 Enclosure is designed to protect the 1046 – PhidgetBridge 4-Input while still giving you access to the USB port and terminal blocks through openings in the enclosure.

There are mounting holes that go through the bottom of the enclosure, so the board can be mounted to a flat surface and the cover can snap on top.

Note: PhidgetBridge and mounting screws **not** included.
