

Micro Switch SPDT (Bag of 2)

This small single-pole, double-throw (SPDT) limit switch is ideal for keeping track of physical parts in a system. It can also be used as a simple user input button as it makes a noticeable click when pressed. It can switch 5A and 125V DC or 250V AC.

Product Specifications

Sensor Properties

Controlled By	Digital Input (5V)
Sensor Type	Input (Switch)
Switch Type	SPDT

Physical Properties

Travel	4 mm
--------	------

Electrical Properties

Switching Current Max	5 A
Switching Voltage Max (AC)	250 V AC
Switching Voltage Max (DC)	125 V DC
