## Micro Switch SPDT (Bag of 2)

This small single-pole, double-throw (SPDT) limit switch is ideal for keeping track of physical parts in a system. It can also be used as a simple user input button as it makes a noticable click when pressed. It can switch 5A and 125V DC or 250V AC.

## **Product Specifications**

## **Sensor Properties**

Controlled By Digital Input (5V)

Sensor Type Input (Switch)

Switch Type SPDT

**Physical Properties** 

Travel 4 mm

**Electrical Properties** 

Switching Current Max 5 A

Switching Voltage Max (AC) 250 V AC Switching Voltage Max (DC) 125 V DC
