

RTD-PT100-SIL-B

Product Description

RTD-PT100-SIL-B: RTD sensor (Pt100), 1/3 DIN accuracy, with silicone cable (with optional pre-wired connector).

This probe is built from a 1/3 DIN precision Resistance Temperature Detector (RTD) element, a stainless steel sleeve and a silicon cable for the most demanding applications. The 3-wire configuration allows for constant correction of errors caused by temperature variations and cable length.
