

TKAD – DIN Rail Mounting Clip

The TKAD DIN rail mounting clip is used for mounting a LabJack device to a DIN rail. Simply attach this clip to the backside of a LabJack device, and clip it to any DIN rail. This clip is manufactured by TE Connectivity, p/n TKAD, or 6-1437661-4.

We recommend two TKAD mounting clips per U6, UE9, and T7, because these LabJack devices have mounting locations for two clips. As shown in the image, the U3 only has one spot for a clip. These clips are also compatible with the grey Snaptrack on our accessory boards. So for instance, it is possible to mount a CB37 to the DIN rail.

RoHS:

Yes
