

Flanged Rotary Bearing for 17mm Shaft

Bearings provide mechanical support for rotating shafts while not interfering with the rotation significantly. This bearing is a flange bearing meaning that it mounts to a surface that is perpendicular to the shaft being supported.

It is suitable for 17mm shaft.

Product Specifications

Physical Properties

Bearing Type Rotary Shaft (Flanged)

Inner Diameter 17 mm

Mechanical Properties

Static Load 6.7 kN

Dynamic Load 12.8 kN
