

# Flanged Rotary Bearing for 8mm Shaft (2pcs)

Bearings provide mechanical support for rotating shafts while not interfering with the rotation significantly. This bearing is a flange bearing meaning that it mounts to a surface that is perpendicular to the shaft being supported.

It is suitable for 8mm shaft.

## **Product Specifications**

### **Mechanical Properties**

Static Load 1.3 kN

Dynamic Load 3.3 kN

Maximum Speed 1.6 km/s

### **Physical Properties**

Bearing Type Rotary Shaft (Flanged)

Inner Diameter 8 mm
