

Flanged Rotary Bearing for 8mm Shaft (2pcs)

Bearings provide mechanical support for rotating shafts while not interfering with the rotation significantly. This bearing is a flange bearing meaning that it mounts to a surface that is perpendicular to the shaft being supported.

It is suitable for 8mm shaft.

Product Specifications

Mechanical Properties

Static Load 1.3 kN

Dynamic Load 3.3 kN

Maximum Speed 1.6 km/s

Physical Properties

Bearing Type Rotary Shaft (Flanged)

Inner Diameter 8 mm
