

# T Slot Panel Insert-PG40 (2m)

The slot reducer is designed to allow installation of a 3-5mm thick panel (acrylic, plexiglass or steel/aluminum plate). You will need enough of the reducer strip to completely enclose the panel. See the T-slot primer in the resources section for more information and pictures on how to use the slot reducer. This reducer is compatible with PG40 extrusions.

**Note:** Orders of quantity less than 50 may be cut into **1m lengths** instead of 2m in order to reduce shipping costs.
