

42DMW61 NEMA17 Brushless Motor with 56:1 Gearbox

The DCM4104 is a 24 volt brushless DC motor, generating 50 Kg-cm of torque at 70 RPM.

Brushless DC motors provide convenient position and velocity control through the use of their built in hall-effect sensor. They run quieter and last longer than their brushed counterparts. The 56:1 planetary gearbox on this motor results in higher torque at the cost of speed.

Connection

This motor must be controlled by a brushless DC motor controller that has the capability to both send control signals to the three motor wires, and also read the hall-effect feedback from the other five wires. Have a look at the Compatible Products tab for a list of compatible Phidget controllers.

Comes Packaged with

This motor comes with a 5-Pin molex connector soldered to the hall effect wires, and ferrules crimped onto the motor wires so it can quickly and easily be connected to the Brushless DC Motor Phidget as shown in the functional picture.

Product Specifications

Motor Properties

Motor Type	Brushless DC Motor
Number of Poles	8
Manufacturer Part Number	42JXG50K(56)/42DMW61-2440
Output Power (Mechanical)	50 W

Rated Torque 51 kg·cm

Maximum Speed at Rated Voltage 70 RPM

Electrical Properties

Rated Current 3.5 A

Rated Voltage 24 V DC

Coil Resistance 740 mΩ

Physical Properties

Mounting Plate Size 17

Operating Temperature Min -20 °C

Operating Temperature Max 40 °C

Gearbox Properties

Gearbox Type Planetary Gearbox

Gear Ratio 56 : 1
