## Draw Wire Encoder (1.5m)

In complex mechanical systems, it is often very difficult to accurately measure the movement of a single part, particularly if it has several degrees of freedom. The draw wire encoder is a versatile solution to this very problem; it can be attached to a part using an M5 screw or fastened to the end with a zip tie, and the encoder itself has a pair of M5 screw threads on the back for easy installation.

When the wire is pulled out, the sensor produces a quadrature signal to describe the length of wire exposed. The reel is spring loaded, so it will retract when there is no tension in the wire. Multiple draw wire sensors could be used to track the position in more than one dimension.

## **Product Specifications**

## **Encoder Properties**

Manufacturer Part Number RLC50D-1500-D1F-1M

Output Circuit Type Push-Pull Wire Resolution 100  $?\frac{1}{4}$ m/cyc

Wire Pull Length 1.5 m

## **Electrical Properties**

Supply Voltage Max 5 V DC Current Consumption Max 60 mA

**Physical Properties** 

Wire Load Maximum 255 g

Wire Pull Speed Max 1 m/s
Weight 485 g
Operating Temperature Min -30 ?°C
Operating Temperature Max 90 ?°C
Screw Thread Size M5
IP Rating IP54
