

Differential Gas Pressure Sensor 50 kPa

Product Description

The 1138 Differential Pressure Sensor is a dual ported air pressure sensor that measures the pressure difference between the two ports. It can measure pressure from 0 kPa to 50 kPa.

Comes Packaged with

- [3002 – 60cm Phidget Cable](#)

Warning

This sensor is designed to measure the pressure of clean, non-condensing air. Contact with moist air (i.e, human breath), dusty air, or other gases can damage the sensor.
