PT1000 4-Wire RTD 20cm

Measure -50 to 500?°C with this stainless steel class B PT1000 RTD probe. As an RTD this probe offers excellent accuracy and very low drift in comparison to what a thermocouple can offer.

If you need to fix it to a panel or mount it inside an enclosure, have a look at the $\underline{HDW4100-1/8''}$ Mounting Nut or the $\underline{HDW4101-M12}$ Mounting Nut.

Note: Beyond the 20cm tip, this RTD is not waterproof.

Product Specifications

Sensor Properties

Sensor Type RTD

Temperature Sensor

Ambient Temperature Min $-50~^{\circ}\text{C}$ Ambient Temperature Max $500~^{\circ}\text{C}$

Class B RTD Temperature Error Max ?±(0.30 + 0.005* t) ?°C?€

Physical Properties

Cable Length 1 m
Probe Diameter 3.2 mm
Cable Diameter 3 mm

Probe Material Stainless Steel

Where t is the measured temperature (without respect to sign).
