### Simple, powerful and affordable test manager for LabVIEW®

TVI is an easy-to-use test management software aimed to simplify and shorten functional testing development time and effort. It allows creating and editing tests and test sequences, managing software and hardware parameters, automatically save test data and generate reports.

#### Ease of Use

Automate test development and integrate interface objects you desire in no time. Easy-to-use tool for test sequences, your test results, it handles execution, saving and report.

#### Seamless integration with LabVIEW®

Efficiently integrate your test into LabVIEW® utilizing test and other underlying software and modules, processes.

#### Sequence Editor

Easily create, edit and monitor test sequence, and test parameters. Create test from requirements, add and manage tests, logs, test messages, run instructions, test sequence.

**Test scenarios**  
Select, store and edit full or partial scenarios of video inputs, triggers and test scenarios. Instantly build and validate your tests and make them reusable for similar results.

**Large resource library**  
TVI comes with an extensive library of video inputs, triggers, sample projects and API functions to help you develop your test scenarios quickly.

**Multi-product and configuration support**  
Define and manage all of products, test software and hardware parameters for each product. Multi-product configuration is supported.

**Reports Viewer**  
Integrated report viewer displays test video, test and live all the records in the database. Test Run as PDF. Customize the reports generated. Test reports are stored PDF as HTML.

**Dynamically load tests**  
Test API loaded dynamically allowing complete scenarios to be loaded for test code and live test management. Frameworks, test test is independent allowing easy development, change and integration.

**User management and permission levels**  
TVI provides test or video, TV offers 3 permission levels: user, manager and admin. Managing video control and software operations user the video and software parameters and test management.
