### Simple, powerful and affordable test manager for LabVIEW®

TVI is an easy-to-use test management software aimed to simplify and shorten functional testing development time and effort. It allows creating and editing tests and test sequences, managing software and hardware parameters, automatically save test data and generate reports.

#### Ease of Use

Automatically generates and displays interface scripts you defined in your code. Easy-to-use test run tree sequences your test results at multiple execution stages and steps.

#### Seamless integration with LabVIEW®

Efficiently connects your code to LabVIEW® utilizing test plan and testing sequence test execution process.

#### Sequence Editor

Easy-to-use tool that manages test sequence and test parameters. Create test from requirements, add and manage tests, steps, sub-messages, run instructions for execution.

**Test scenarios**  
Select, store and edit full or partial scenarios of video inputs, triggers and test scenarios. Instantly build and deploy your tests and reuse them whenever you require results.

**Large resource library**  
TVI comes with an extensive library of video inputs, triggers, sample projects and API functions to help you develop your test scenarios quickly.

**Multi-product and configuration support**  
Define and manage all of products, test software and hardware parameters for each product. Multi-product configuration is supported.

**Reports Viewer**  
Integrated report viewer displays test video, test and live all the records in the database. Test Run as PDF. Customize the reports generated. Test reports are stored PDF as HTML.

**Dynamically load tests**  
Test API loaded dynamically allowing complete scenarios, triggers, test code and live test management. Triggers, test code is independent allowing easy development, change and integration.

**User management and permission levels**  
Web production test or video, TV offer 3 permission levels. User management and testing, viewing video control and software operations. User the video and software production and test management.
