Simple, powerful and affordable test manager for LabVIEW®

TVI is an easy-to-use test management software aimed to simplify and shorten functional testing development time and effort. It allows creating and editing tests and test sequences, managing software and hardware parameters, automatically save test data and generate reports.

Ease of Use

Automatically generates and displays interface scripts you defined in your code. Easy-to-use test run tree sequences your test results at multiple execution stages and steps.

Seamless integration with LabVIEW®

Efficiently connects your code to LabVIEW® utilizing test plan editor testing sequence and execution process.

Sequence Editor

Easy-to-use tool that manages test sequence and test parameters. Create test from requirements, add and manage tests, steps, sub-messages, run instructions for execution.

Test scenarios
Select, store and edit full or partial scenarios of video inputs, triggers and test scenarios. Instantly build and deploy your tests and reuse them whenever you require results.

Large resource library
TVI comes with an extensive library of video inputs, triggers, sample projects and API functions to help you develop your test scenarios quickly.

Multi-product and configuration support
Define and manage all of products, test software and hardware parameters for each product. Multi-product configuration is supported.

Reports Viewer
Integrated report viewer displays test video, test and live all the records in the database. Test Run as PDF. Customize the reports generated. Test reports are stored PDF as HTML.

Dynamically load tests
Test API loaded dynamically allowing complete scenarios to be loaded for test code and live test management. Frameworks, test test is independent allowing easy development, change and integration.

User management and permission levels
Web production test or video, TV offer 3 permission levels: user, manager and admin. Managing video content and software operations using the browser and software production and test management.

Starter / \$4000	Basic / \$8000	Full / \$12000	Pro / \$18000
1 Full Scenario generated 100000	1 Full Scenario generated 100000	1 Full Scenario generated 100000	1 Full Scenario generated 100000
100000 test reports generated	100000 test reports generated	100000 test reports generated	100000 test reports generated
100000 test reports generated	100000 test reports generated	100000 test reports generated	100000 test reports generated

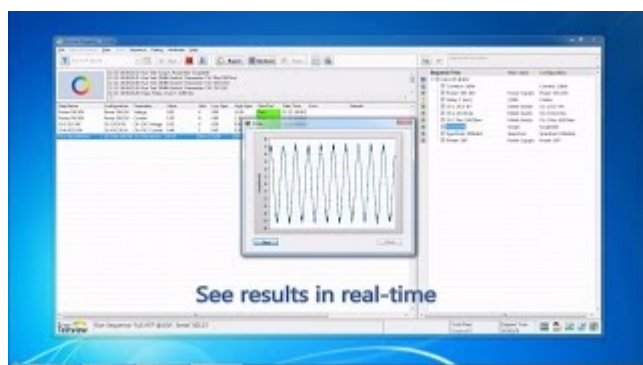

• 1 Full Scenario generated
• 100000 test reports generated
• 100000 test reports generated
