

Pro License

Simple, powerful and affordable test manager for LabVIEW

TVI is an easy-to-use test management software aimed to simplify and shorten functional tester development time and effort. It allows creating and editing tests and test sequences, managing software and hardware parameters, automatically save test data and generate reports.

Ease of Use

Easy-to-use approach and intuitive interface simplify your access to all main functionality and save the precious development time and resources during and after.

Seamless integration with LabVIEW

Effortless access your LabVIEW applications and other underlying software and hardware devices.

Test Results

Easy access and full control test execution and the outcomes. Filter results from requirements, add and manage tests, tests configurations, run distribution for execution.

Real-time analysis
 Select, analyze and edit full or wide sections of video frame buffers and test waveforms. Instantly zoom and pan the video frame with mouse functionality to locate results.

Large resource library
 Thousands of comprehensive waveforms, settings, trigger patterns and test functions to help troubleshoot the hardware solution.

Multi-product and configuration support
 Define and manage all of products, test software and hardware parameters for each product. Multimeter configuration is supported.

Reports Viewer
 Allocated board-level reports to view, edit and share all the records in the database. Send files as PDF. Customize the reports appearance and export the data PDF or HTML.

Dynamically load tests
 Load up boards dynamically allowing complete hardware freedom for test setup and the test management framework, even test in independent sharing and development during and program.

User management and permission levels
 99% production test or demo. TV offers 3 permission levels: Query, Program and Admin. Creating valid control and software operations user for better and efficient production and test management.
