

7-Port USB Hub

So many USB devices, so few ports. With this USB hub for your VINT SBC, you'll have access to seven full-speed USB 2.0 ports. You can also use this USB Hub directly from your computer, if you just want an awesome USB 2.0 powered hub to keep all of your Phidgets happy.

Because we know you're going to be plugging all sorts of power-hungry devices into this hub, we've made it externally powered by a power supply of 8 to 30 volts. That means you're not limited to the amount of power that this hub gets from the upstream USB connection.

Product Specifications

Board Properties	
Controlled By	USB
USB Hub	
Number of USB Ports	7
Available Current per USB Port	500 mA
USB Speed	High Speed
Electrical Properties	
Supply Voltage Min	8 V DC
Supply Voltage Max	30 V DC
Current Consumption Min	100 mA
Current Consumption Max	3 A
Physical Properties	
Power Jack	5.5 x 2.1mm Center Positive
Operating Temperature Min	0 °C
Operating Temperature Max	70 °C
